Mixtrack Pro II - VirtualDJ Pro Mapping Installation Instructions

These mappings allow users to add support for the Mixtrack Pro II to VirtualDJ Pro.

To install this Mixtrack Pro II custom mapping, perform the following:

1. Copy the XML mapping file **Numark Mixtrack Pro II Mapper.xml** to the following folder:

    - **Windows:**

      My Documents\VirtualDJ\Mappers

    - **Mac:**

      /Users/YOURNAME/Library/Mappers (New installations of v7.0.3 or later)

      /Users/YOURNAME/Documents/Mappers (Older installations)

2. Copy the XML definition file **Mixtrack Pro II Device.xml** to the following folder:

    - **Windows:**

      My Documents\VirtualDJ\Devices

    - **Mac:**

      /Users/YOURNAME/Library/Devices (New installations of v7.0.3 or later)

      /Users/YOURNAME/Documents/Devices (Older installations)

    NOTE: A registered full VirtualDJ Professional license is required to be able to use mappings.
