

Numark Orbit – Remix Deck Mapping

This mapping requires Traktor Pro 2.6.2 or higher

1. Plug in and power on your Numark Orbit.
2. Open **Numark Orbit Editor**. If you do not have the Orbit MIDI Editor you can download it [here](#).
3. Click **Load** from the **Manage Mappings** section.

4. Browse your computer to locate the **Orbit Remix Deck MIDI Preset.json** editor file.
5. Click **Send**. You should see **Mapping Sent Successfully**.
6. Close **Numark Orbit Editor** by clicking **File > Exit** (Windows) or **Quit Numark Orbit Editor** from top menu (**Mac**).
7. Open Traktor Pro 2.6.2 Software.
8. Click the **Preferences** or **gear** icon from the top right menu.

9. Select **Controller Manager** from the list on the left.
10. Click the **Add... > Import** from **Device Setup**.

11. Browse your computer to locate the **Orbit Remix Deck [C].tsi** mapping file.
12. Ensure that the **Numark Orbit** is selected as your **In-Port**, and **Out-Port**.
