

## iCD DJ IN A BOX

### COMPLETE CD DJ SYSTEM

**iCD DJ IN A BOX IS A COMPLETE DJ SETUP WITH TWO CD PLAYERS, HEADPHONES, A MIC, AND A DJ MIXER WITH IPOD DOCK.** The two included NDX200 CD players each have a large jog wheel for comfortable performance. Numark's Anti-Shock™ buffered skip-protection technology keeps your music playing even when vibrations might cause other players to skip. Seamless looping enables you to easily create and integrate instant remixing. A two-channel iM1 mixer has all the essentials, such as two input channels, main and headphone outputs, mic input, and smooth faders. Plus it's the world's first DJ mixer that enables you to play tracks from a docked iPod and record your mix to the iPod. iCD DJ IN A BOX is a package that's completed with crisp, clear HF125 headphones for previewing your mix, and a WM100 mic so you can talk over the mix and get the audience really into the music. Whether you are an experienced veteran or just starting out, iCD DJ IN A BOX gives you everything you need to rock the house.
