VIRTUAL DJ LE

IDJ3
DIGITAL DJ SETUP

DJ WITH YOUR COMPUTER, YOUR IPOD, OR BOTH! iDJ3 is a complete DJ system that works with the music on your Mac or PC – and your iPod. It's designed to directly connect to your computer so you can mix your favorite tracks with performance DJ controls. Plus, you can dock your iPod or iPhone and play tracks and record your mix. iDJ3 has two decks, each with a large, touch-sensitive turntable for accurate scratching, beat-juggling and locating precise points within your tracks. It's just like working with a record. In addition to the two decks, iDJ3 has an easy to use audio mixer so veteran DJs and beginners alike will be able to step right up and get the party going. If you're DJing for the first time, iDJ3 is a great place to learn because your skills will transfer to any other DJ system.

iDJ3 comes with powerful Virtual DJ LE software, which makes it easy to mix your favorite music. You can even create loops and hot cues for mixing like pro DJs. Virtual DJ enables you to sort your library by genre, BPM, artist, and more. iDJ3 also works with your iTunes music library, and because it's a MIDI-over-USB controller, it is compatible with virtually all DJ software.

iDJ3, while a powerful controller for software, also houses a complete audio interface, which enables you to input and output high-quality sound. Whether you're connecting iDJ3 to the computer, to the sound system, for recording, previewing in headphones, or talking over the music with a mic, iDJ3 gives you all the inputs and outputs you'll need.

The world's most popular portable music player works perfectly with iDJ3. No matter which model of docking iPod or iPhone you have, you can play, mix, and record with it and iDJ3. You can even plug in an optional power supply and charge your iPod.

FEATURES:

- iPod dock for mixing, recording, and playing your sets
- Large, touch-sensitive platters for accurate control and scratching
- Classic dual-deck layout with complete mixer section
- Built-in audio connections for previewing and playing out
- Lighted controls indicate status in software for less time looking at the computer
- Includes Virtual DJ LE DJ software and is compatible with virtually all DJ software
