

## M6USB

### FOUR-CHANNEL USB DJ MIXER

**VERSATILE, FLEXIBLE MIXING WITH COMPUTER INTEGRATION.** This four-channel mixer works with standard sources including turntables and CD players, plus it has a USB computer connection for playback and recording with your Mac or PC. M6 features three-band EQs and LED metering on each channel. It has a rugged, replaceable crossfader with slope control, and you can assign any channel to either side.

### FEATURES:

- Four input channels, each with gain, three-band EQ, and LED metering
- USB computer connection for playing and recording with Mac or PC
- Play music from music-player software
- Record your mix to your computer
- Phono and line inputs on each channel
- Dedicated XLR mic channel and additional mic input on channel 4
- Replaceable crossfader with slope control
- Assign any channel to either side of the crossfaders
