

DXM09

3-CHANNEL DIGITAL TABLETOP DJ MIXER

MORE CHANNELS, MORE EFFECTS, MORE DJ CAPABILITY.

The DXM09 offers the cleanest audio signal and the most creative options available in a tabletop mixer. The 100% digital circuitry on the Numark DXM09 provides the lowest noise floor available, and the unit's built-in, look-ahead peak limiting prevents clipping, to ensure an ultra-clear output signal at all times.

The mixer's on-board effects section gives the DJ on-the-fly control over multiple parameters such as rate, beat sync, and mix intensity. The DXM09 is equipped with a premium crossfader designed for performance and reliability. Cuts and fades are completely-customizable, with full slope control.
